Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Request for Continued Examination

1. The Request for Continued Examination filed on 4/01/04 (RCE) under 37 CFR 1.114 based on parent Application No. 10/070,715 is acceptable and a RCE has been established. An action on the RCE follows.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 10, 12-16, 18-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Petho et al. (US 4,987,726).

Petho et al. disclose a method and device for filling and sealing containers in a clean environment with clean room 3. Containers are closed in a closing or stoppering station; see figure 7. Petho et al. disclose "The system, which is sealed from the exterior, is provided with known sealing lock arrangements for the sterile introduction of empty bottles," etc. (see abstract, last sentence). Prior to entering the clean room 3 the containers are cleaned in cleaning lock 17 before entering tunnel 14; see figures 1 and 2. Second cleaning lock is provided (inside clean room) for sterile stoppers; see column 4, lines 27-33 and column 7, lines 47-60. The sterilization method disclosed uses an inert gasification device (nitrogen).

Regarding claims 15-16, Petho et al. disclose "Both the supply tunnel and the discharge or outfeed means are provided with a known sealing lock arrangement (not shown) for maintaining sterility and a suitable pressure... in the tunnel 14." (column 4, lines 6-9). Therefore, the filled and sealed bottles when returned to tunnel 14 are further cleansed (exterior) with a positive pressure before final discharge. The stoppers of filled bottles are then wrapped or encapsulated by a second or final sealing device (see column 13, lines 40-45).

The cleaning lock of Petho et al. contains a steam distributor (considered both a liquid and germicidal gas).

The stoppers/sealing devices are sterilized either before entering or in the magazine by "steam, washing liquid, etc." (column 4, lines 52-56).

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher R Harmon whose telephone number is 703-308-8643. The examiner can normally be reached on Monday-Thursday from 8-6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rinaldi Rada can be reached on 703-308-2187. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
